Quick Start

Follow these three steps to create your first Line Design Project:

Step 1: Go to Main Menu item "File->New File..." to create a new Project File. Then Right-Click on the File Node in the new Window and select "New Design". Populate all General Project data and default values.

Step 2: Add Poles, Anchors and all Attachments to the Project Work Plan Area and adjust as necessary to match your project's needs.

Step 3: Go to the Analysis Tab and Press the "Analyse Everything" button to view summary results for your entire Project. Right-Click on a Pole Structure Node for additional Reporting Results.
